THE PEW CENTER ON THE STATES' Government Performance Project

The Pew Charitable Trusts applies the power of knowledge to solve today's most challenging problems. **Pew's Center on the States** identifies and advances effective policy approaches to critical issues facing states.

The mission of the **Government Performance Project**, an initiative of the Pew Center on the States, is to improve service to the public by strengthening government policy and performance.

The Project evaluates how well states manage employees, budgets and finance, information and infrastructure. A focus on these critical areas helps ensure that states' policy decisions and practices actually deliver their intended outcomes.

The **INFRASTRUCTURE** performance grades assess how states maintain, improve and plan for future physical infrastructure needs, including roads, bridges and buildings.

www.pewcenteronthestates.org

The Project grades but does not rank states. All states within a given grade category receive the same grade and are listed alphabetically.
